

Grammarly Premium Invitation

(Email sent by Dan Bascelli to attendees of the AI in Writing with CWP Workshop)

Hello everybody, and Happy New Semester!

Regarding AI tools, the one we have been most eager to see our students adopt is Grammarly Premium, which we offer free to all students. This is not the “Generative” AI that Grammarly also offers. It is an easy-to-use and intuitive online program that integrates with your email and writing programs.

Grammarly Premium is an online assistant that offers advanced writing suggestions to help ensure your writing is clear, concise, and mistake-free. It assists in the following areas:

- **Grammar and punctuation:** Checks for grammatical mistakes and punctuation consistency
- **Vocabulary:** Provides vocabulary enhancement suggestions and word choice enhancements
- **Tone:** Provides tone adjustments and tone suggestions
- **Sentence structure:** Suggests full-sentence rewrites and sentence variety
- **Plagiarism:** Detects plagiarism
- **Formatting:** Provides suggestions for formatting
- **Inclusive language:** Provides suggestions for inclusive language
- **Customization:** Allows you to customize your experience with your preferred language, personal dictionaries, and the ability to disable certain sites
- **Privacy and security:** Offers enterprise-grade privacy and security

If you do not already have a Grammarly Premium account, you can get one using your Spelman.edu email address at <https://invite.grammarly.com/gz5d7fpU>

Grammarly Premium is not flagged in plagiarism detection software such as Turnitin for being AI-assisted writing.
